**Lynn Keffer** began making etchings over 25 years ago at *The Visual Arts Center of New Jersey*, located in Summit. Prior to that her professional background was graphic design and art direction, working on magazines, annual reports and other corporate communications. More recently she started using her etchings as content for her artist books.

Working with a series of etched surfaces, her starting point is controlled and structured. Then, the structure is changed in visual ways, through the use of color as well as layers and masking techniques. The challenge is to explore what is the third thing, or fourth layer that can influence the image.

In these images of a symbolic house, or grid of houses, the addition of the layered graphic patterns is controlled, but in the process of printing surprises happen. The starting point is like a phrase, but it can be edited to retell the narrative.

Exhibition: November 22, 2022 - December 11, 2022; Opening Saturday November 19th.
